Mounted on the front of the lens-tube, where the dower is located, this device will allow you to remotely control the dower either by DMX or by manual clamp-on slider control, which can be positioned anywhere on either side-control bars of the followspot, to suit every operator's needs.

The unit is supplied complete with clamp-on control slider and 2.1m mains cable fitted with PowerCon OUT connector. Mains cables in any desired length can be obtained on demand.

This device has been designed as a specific accessory to LDR TANGO range of followspots and will therefore only work with LDR TANGOs.

2. PRODUCT SPECIFICATIONS

Supply volts:	180/260V
Frequency:	50/60Hz
Power Consumption:	15W max
Connector:	Neutrik PowerCon IN
Net Weight	2kg

3. PACKING CONTENTS

The remote control is supplied as a kit. Please make sure the packing you have received includes the following:

- Motorized Control of Dowser
- Clamp-on slider control with cable
- 2.1m mains cable with PowerCon Out connector fitted

4. NEEDED TOOLS

In order to install this device you will need:

- Phillips screw-driver for M4 and M5 heads

5. INSTALLATION

- Remove the handle (B) from the control bar of the dowser by slackening the provided screw (A), as indicated here below:

- Remove the 4x M5 screws from the side profile of the Tango's lens-tube
- Position the unit on the top of the lens-tube of the Tango matching the holes and making sure the control panel of the unit looks backwards (see picture on page 3)
- Screw the assembly to the body of the Tango using the M5 screws you have just removed
- Remove the M4 screw + washer from the lever-actuator (A), bring the lever of the dowser (B) in line with the lever-actuator on the motorized control and screw them together. (See picture here below). The provided screw is longer than the actuator and once fitted it should look like the picture here below.

CAUTION: Do not try to force the screw and make sure there is gap between the actuator and the head of the screw. This will grant a smooth movement of the dowser. Tightening the screw will cause the dowser to jam.
